

Report on the Luncheon with IDF President Professor Jean Claude Mbanya

Diabetes Australia President, Patricia McKenzie, Board Members and invited guests celebrated the achievements and partnership between the International Diabetes Federation (IDF) and Diabetes Australia on 3 September 2010 at the Darlington Centre, Sydney University.

Diabetes Australia has a longstanding relationship with the IDF. The IDF commenced in 1950 and Australia joined in 1955. We confirmed our commitment to the IDF, as Australia's peak body for people with diabetes and intention to strengthen our already strong relationship with the IDF.

The Luncheon was attended by Prof Jean Claude Mbanya, the Honorable Judi Moylan MP, past and present Diabetes Australia IDF Representatives and the Diabetes Australia Board. The luncheon was a great success; it reinforced the importance of a collective and collaborative approach by stakeholders to prevention, early detection and management of diabetes.

**Greg Johnson, Acting CEO Diabetes Australia, The Hon Judi Moylan MP and
Professor Jean Claude Mbanya, IDF President**
