About the theme

A healthier future – for everyone

This **National Diabetes Week** we are shining a light on **prevention** to positively change lives. With type 2 diabetes making up about 85% of cases, it's important to emphasise early intervention. Studies show that **up to 58% of type 2 diabetes cases can be prevented or delayed** through proactive measures and lifestyle changes.

This week, we focus not only on preventing **type 2 diabetes**, but also on reducing complications for those with all forms of diabetes, including **type 1**, **type 2**, and **gestational diabetes**. Serious complications such as amputations, kidney failure, and vision loss are often avoidable with timely care and effective support systems. By empowering individuals to manage their health, we can significantly enhance their quality of life. As we **raise awareness**, it is important to understand that effective prevention and management matter at every stage of the diabetes journey. The right support can help individuals implement small but impactful changes that reduce the risk of severe complications.

This National Diabetes Week, let's commit to spreading awareness and ensuring that everyone has access to the resources they need for healthier lives. By building better understanding and offering stronger support, **we can help create a healthier future - for everyone.**

The campaign landing page contains all key information: diabetesaustralia.com.au/national-diabetes-week

Key information

Stay tuned during National Diabetes Week for important announcements.

Important: Please don't share these activities until National Diabetes Week begins (from 13 July 2025).

Supporting people <u>at risk</u> of type 2 diabetes	Supporting people living with type 1 diabetes	Supporting people living with type 2 diabetes
Type 2 diabetes risk calculator	Annual cycle of care	GroAus app – free trial
Find out if you're at risk of type 2 diabetes and what you can do next – in just two minutes . Learn more >	An annual cycle of care is a checklist designed to help you and your healthcare team stay on top of your health as your needs change and reduce the risk of complications.	We've teamed up with GroAus , a leading diabetes management app, to give people living with type 2 diabetes the opportunity to trial free for six months .
Free Priceline health checks Priceline are offering FREE health checks at over 300 Priceline Pharmacy stores, helping you to stay on top of your health by assessing your BMI, blood pressure, risk of type 2 diabetes, body fat percentage and more at self - serve health stations with instant results. Learn more >	Learn more > Join the call for insulin pump subsidies We know that access to diabetes technology, like continuous glucose monitors (CGMs) and insulin pumps, can significantly improve daily life and reduce risks of complications. While CGMs are subsidised, insulin pumps currently aren't, and we believe that needs to change. Learn more >	 Backed by science and designed to support real-life routines, the program supports you to: Eat well – with personalised nutrition guidance Move more – with fun activity ideas Sleep better – to feel your best Practice self-care – with simple tools for daily life Learn more >

National Diabetes Week

13 - 19 July 2025

A healthier future – for everyone

This National Diabetes Week, we're focusing on prevention — because it matters at every stage of the journey.

Whether it's preventing type 2 diabetes or complications for people living with type 1, type 2, or gestational diabetes, awareness and action make a difference.

Together, we can create a healthier future for everyone.
