

Clinical research study for people with excess weight who also have heart disease or kidney disease, or both

TRIUMPH-Outcomes

TRIUMPH-Outcomes is a clinical research study for people with excess weight who also have heart disease or kidney disease, or both.

The study will test if the investigational medicine (a medicine being studied) may help reduce the risk of heart disease and kidney disease in people with excess weight.

THE PERSONS DEPICTED IN THIS POSTER ARE MODELS AND THE IMAGES ARE BEING USED FOR ILLUSTRATIVE PURPOSES ONLY

Can I join this study?

Yes, you may be able to join this research study if you:

- have a BMI of 27 kg/m² or more
- are aged 45 years or older
- have at least one of the following:
 - heart disease
 - kidney disease
 - type 2 diabetes or not, and your HbA1c levels are equal to or less than 10 percent (86 mmol/mol).

BMI stands for **body mass index**. It is a number that compares a person's weight to their height. It can be used to tell if a person may be at risk of some health conditions.
